

Global Aquaculture Innovation Award

Application Form

In 2012, the Global Aquaculture Alliance established the Global Aquaculture Innovation Award to recognize individuals and companies finding new solutions to the key challenges facing aquaculture. Examples include technologies that mitigate the occurrence of animal diseases or parasites, or that reduce or eliminate the use of antibiotics to treat animals; technologies that improve production efficiencies at the hatchery or farm levels while mitigating environmental impact; advances in offshore or land-based recirculation technology; novel feed ingredients; reductions in carbon footprint through improved energy efficiency or regeneration; and social programs designed to improve living and working conditions at the farm or processing levels.

Both individuals and companies performing activities related to aquaculture as well as third parties may submit applications for consideration. Although participation in GAA's Best Aquaculture Practices third-party certification program is not required, applicants associated with BAP may receive preferential review. To apply, fill out the application form and email it to Dan Lee at dan.lee@aquaculturealliance.org. Please include photographs of the innovation.

This year's award recipient will receive an all-expenses paid trip (including registration, flight and hotel) to GAA's GOAL 2018 conference in Guayaquil, Ecuador, from Sept. 25 to 27, 2018, as well as the opportunity to present at GOAL 2018 and be featured in the Global Aquaculture Advocate.

Submitted by _____ Organization _____

Telephone _____ Email _____

Submission date _____ Submission type Person Business

Photos Included? Yes No

Nominee name _____ Organization _____

BAP certification number (if applicable) _____

Address _____

City _____ State/Province _____

Postal code _____ Country _____

Telephone _____ Email _____

Would a representative of your organization be available to present at GOAL 2018? Yes No

Summarize the innovation (100 words max):

Describe the specific problem or area of concern that this innovation addresses (50 words max):

Describe the innovative solution to this problem (200 words max):

How does this innovative solution exceed standard industry practice (100 words max)?

Describe your success or outcomes (100 words max):

What is the potential scope for the application of this innovation to the wider industry (100 words max)?
